

WebQuests are inquiry-based projects that help students develop critical thinking and research skills through finding, discussing, analyzing, and synthesizing information found on the web.

This hands-on workshop will explore WebQuests, introduce users to their basic design principles, discuss ways of integrating them in foreign language instruction, and situate the WebQuest activities within the ACTFL themes for world languages.

WEBQUESTS AS THEME-BASED, INQUIRY-ORIENTED ACTIVITIES IN THE FOREIGN LANGUAGE CURRICULUM

WITH **ELENI MILTSAKAKI, PH.D.**

Computational Linguist, Computer and Information Science

AND **CHRISTINA FREI, PH.D.**

Academic Director, Penn Language Center

Friday, November 2nd

2:00 to 5:00 PM

Van Pelt Library

Goldstein Electronic Classroom
